Make a Bigger Difference for Children with Autism

Are you looking for an effective autism service model that includes parent involvement?

You can now attend The Hanen Centre's renowned **More Than Words® workshop for SLP/Ts** from the comfort of your home or office – anywhere in the world.

More Than Words offers a clear and evidence-based framework for zeroing in on the specific communication needs of young children with autism or social communication difficulties. You'll learn a naturalistic, family-centered approach that empowers parents to support their child's communication during everyday interactions. You also become certified to lead the **More Than Words parent program** and receive digital resources to apply the strategies you learn in one-to-one therapy settings.

This workshop will run over 4 days rather than the typical 3 days to accommodate bilingual English and Slovenian speakers. While the workshop will be offered in English, small group discussions may take place in either English or Slovenian. Since we are not able to offer these bilingual, 4 day workshops often, we encourage you to take advantage of this opportunity to connect with other Slovenian speaking SLP's!

Upcoming training opportunity

The Hanen Centre is now offering the *More Than Words* workshop to professionals in your region!

When: May 10 - 11 & 17 - 18, 1:00 - 8:30 PM CEST

Where: Online

What participants have said...

"I came in knowing that I would leave with valuable knowledge and resources to use, but you guys exceeded my expectations with the online format. I didn't think it was going to be as engaging as my previous training that was in person, but it absolutely was."

"I have a much better understanding about the different stages of communication and how to help parents assist their children with peer play and interaction."

"I'm almost angry at myself for not having taken this workshop earlier. It is so relevant for my work."

About the Hanen Centre

The Hanen Centre is a not-for-profit charitable organization with a global reach. Our mission is to enable parents and professionals to transform their daily interactions with young children to build the best possible lifelong social, language and literacy skills. This includes children with or at risk of language delays and those with developmental challenges such as Autism Spectrum Disorder.
